

## Guide to Abecedary Drawing Effects created by Diego Nasseti

Diego Nasseti has created 26 different drawing effects (February 2021), one to each letter of the Abecedary. This guide tries to help the user find the desired style more quickly by having some images showing those effects.

To give more versatility to all kinds of images, the filters created by Diego provide the possibility of applying masks to soften the effects on those areas of the images that require a more delicate treatment. This can be faces, delicate flowers, etc. Also he has added other interesting possibilities in his filters to rich or give other looks to the images with nuances, or different drawing styles. The user can find attractive frames to apply if the user wishes it, too.

He has created a lot of artistic filters. Most of them faithfully reflect the true strokes of the painting on a canvas. But this guide is intended only to show the effects that correspond to each letter.

There is more than one image so that the user can see the effect previously before applying the filter at once.
