INSTALL INSTRUCTIONS

Method 1:
simply double-click the .ATN file. Photoshop should open up and load the action set automatically. If Mac OS or Windows asks you for a program, choose Photoshop.
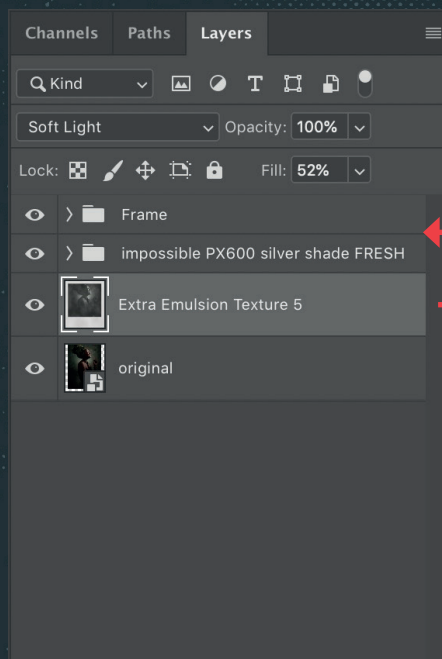

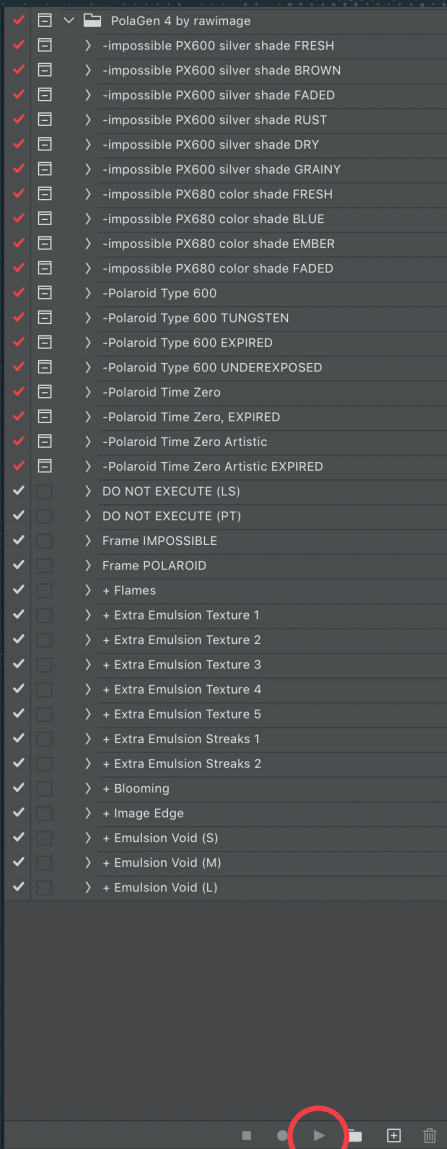

Method 2:
in Photoshop go to Window/Actions and open the actions window. From there go to the burger menu in the upper right corner and choose *Load Actions...*

——

HOW TO USE

Unfold the action set called *Polagen 4 by rawimage*. Open an image, choose one of the actions with a red checkmark and click the Play button at the lower end of the Actions window.

Most of the other actions are used by the main actions. You can run them after the main action has finished, to add some more textures and other effects.

Layers panel

Channels | Paths | **Layers**

Kind

Soft Light | Opacity: 100%
