

a short explanation
This is the program cover..

(A) Don't forget that after installing GimPac and whenever you open Gimp it will appear in our Taskbar

- 1º - Let's load our Settings (1)
- 2º - Search for where we have our Gimp installed.. (2)
- 3º - Here we put our version of Gimp (3)
- 4º - Enable the Delete Button from the Gimp Toolbox (4)
- 5º - Enable GimPack launch box together with Gimp (5)
- 6º - Time in seconds that GimPack takes to close after Gimp (6)
- 7º - Load to check if everything is ok (7)

Let's go where everything happens..

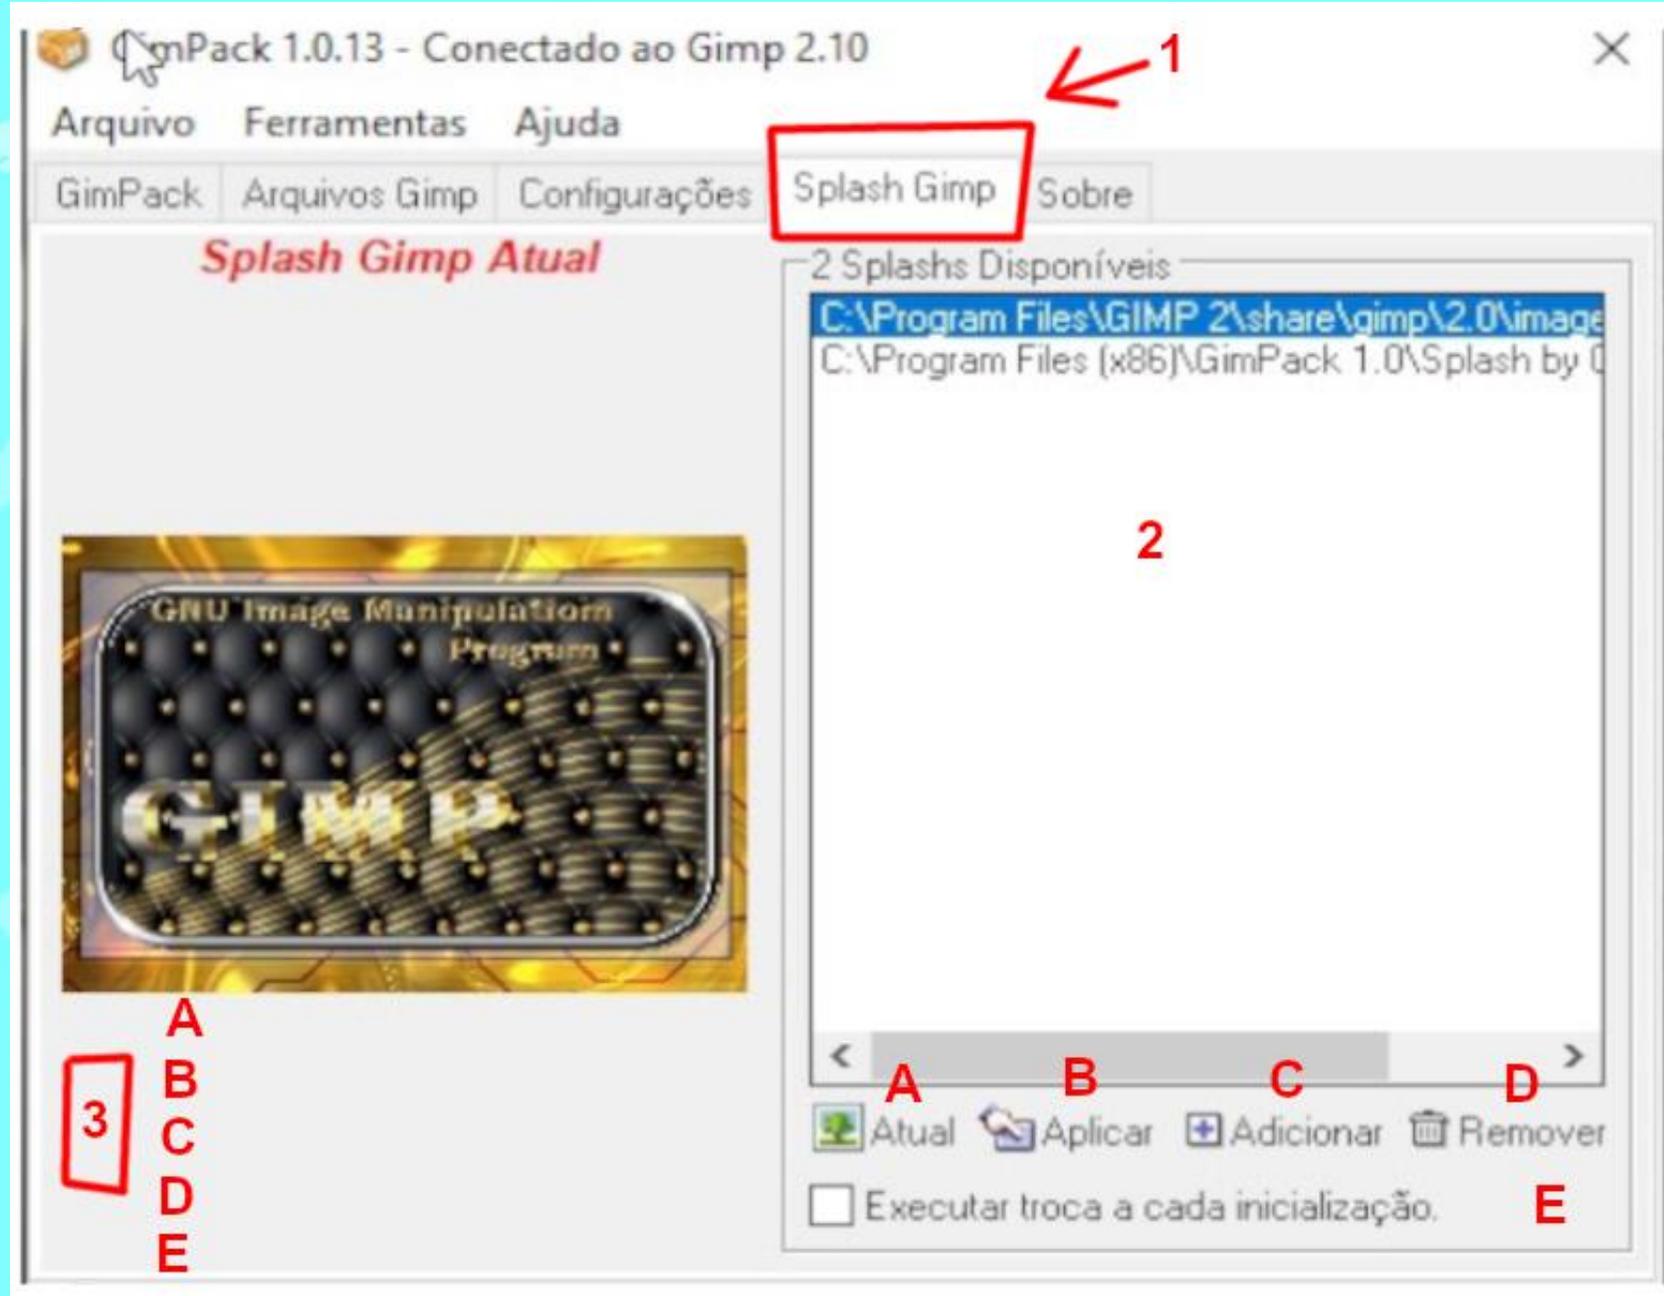

1º - Load into Gimp Files. (1)

2º - Load what we are looking for (Brushes, Gradients, Color palettes,Textures, Fonts) and everything will appear in this Box. (2)

3º - Here we can delete everything, or what we have only selected, (3) or we can delete it from Gimp (A)

4º - Here we can Create, (B) Install, (C) or Uninstall our GimPack Files. (D)

1º - Here we look for our Covers. (1)
2º - The place where they are. (2)
3º - Program Cover (A), Apply to what we want (B), We can add more (C), Or remove (D), Checking the box. We can change it every time we open Gimp, (D)

In Help, in the drop-down list, click GimPack Help
