

How to Crystallize an image

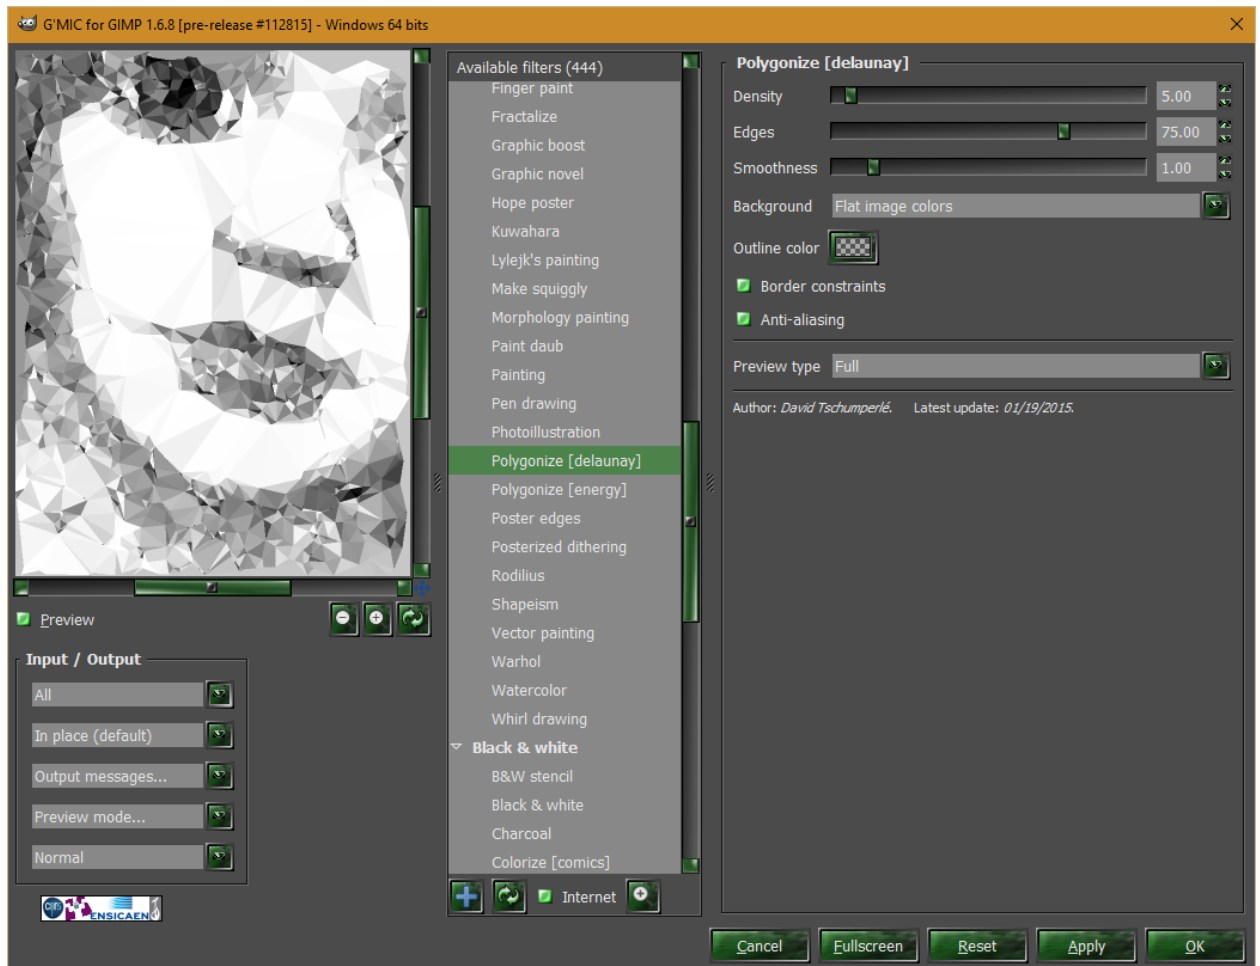

Ref: <http://www.fontplay.com/freepotos/seventhn/fp021107-08.jpg>

First Dup and run engrave setting on top layer:

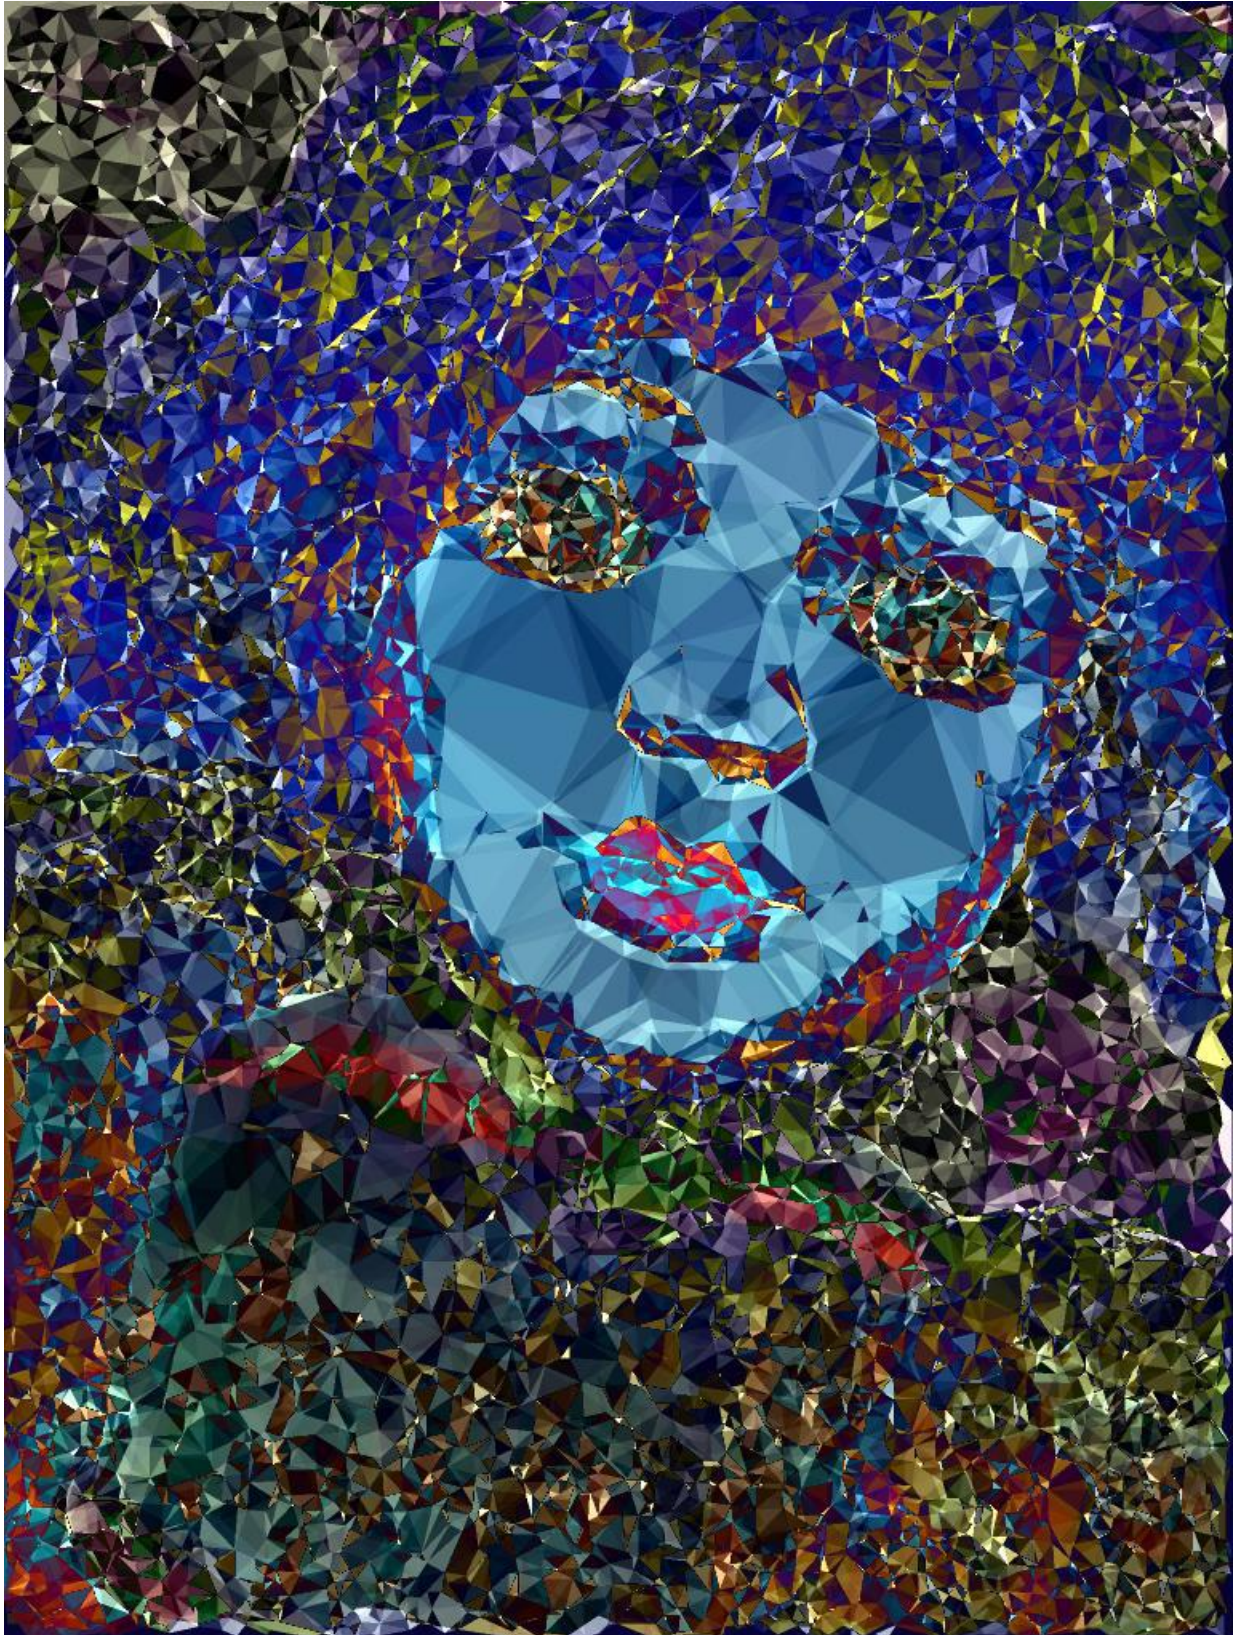

On the poly step, you need to set the edge opacity to completely transparent.

Now run Polygonize (delaunay) on both layers:

Set Top layer to difference, merge (or flatten) down and auto-level:
