

CARICATURES (WITH SAM'S X4 HARD SKETCH, & THE SHOCK EFFECT)

CARICATURES (WITH SAM'S XY HAIRD SKETCH, & THE SHOCK EFFECT)

Easy to do it.

This way to do a caricature would be more elaborate, but now is better to start more easily.

Open in Gimp the pic of our victim (in this example the King of Spain):

Now in **Filters** → **Distortions** we apply **lwarp** and “work” the image according our creative criteria according to the idea we have in mind. Caricatures aren't easy to do.

My result is:

CARICATURES (WITH SAMJ'S XY HARD SKETCH, & THE SHOCK EFFECT)

I've tried highlight facial features typical of the Bourbons, in fact has a remarkable resemblance to his father, the Count of Barcelona.

Now, in G'MIC select Output Mode New layers(s), and apply:

Enhancement → Smooth bilateral with the default values.

Select this Bilateral layer.

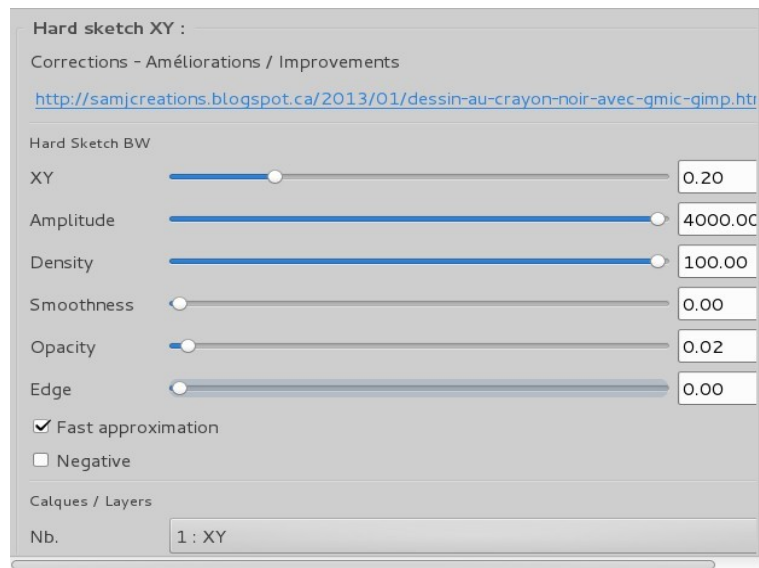

Now will apply [TheShock Effect](#), but we'll use **Samj's XY Hard Sketch** instead Hard Sketch (Black&White).

Testing → Samj → XY Hard Sketch

and set the values like TheShock's tutorial.

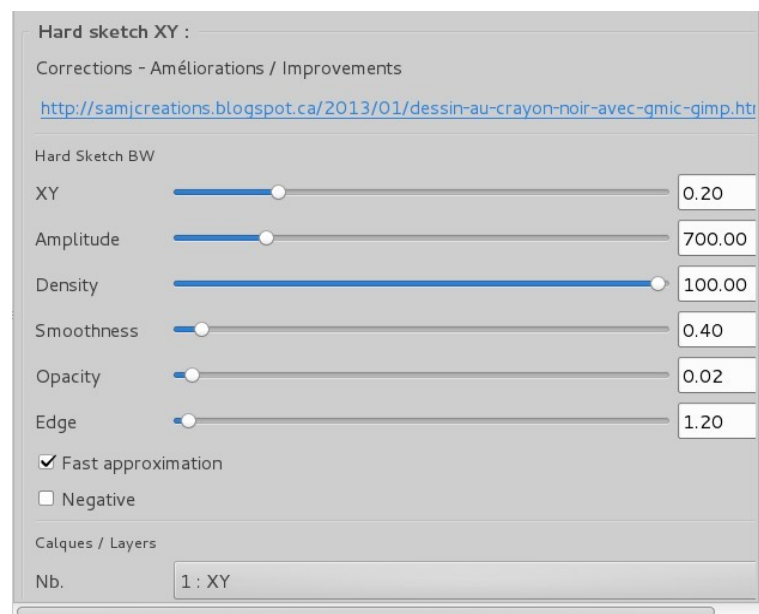

CARICATURES (WITH SAMJ'S XY HARD SKETCH, & THE SHOCK EFFECT)

XY HardSketch1:

Set this layer in Soft light and duplicate it.

XY Hard Sketch 2:

Set this new layer in Soft light mode and opacity: 60 %.

You can try with other blend modes and choose what you likes.

CARICATURES (WITH SAM'S XY HARD SKETCH, & THE SHOCK EFFECT)

The result:
