

Custom font Perspex Effects v0.2

This plug-in produces a translucent effect for use with Custom Fonts.

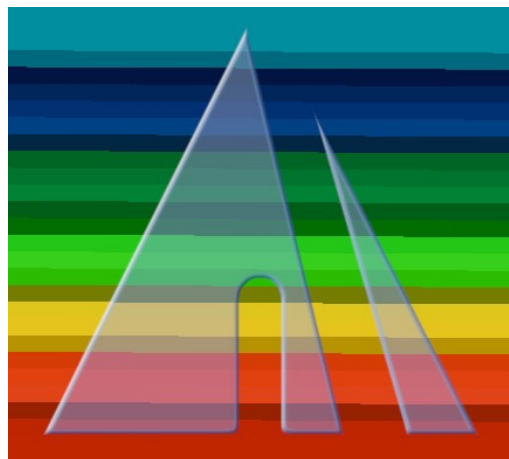

Filters>>Custom Fonts>>Decorating Tools>>Custom Font Perspex Effects 0.2

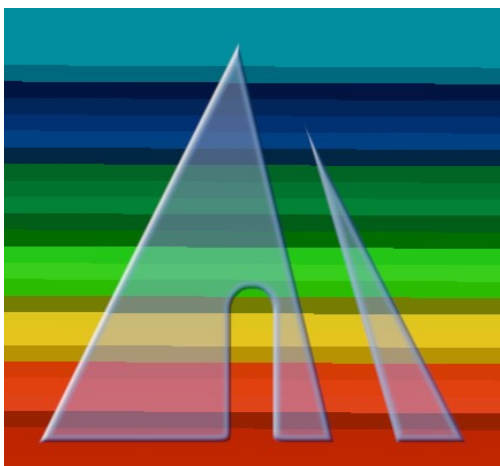

Plain colour refers to white but there are other colour options to use.

The edge width displays more of the selected colour.

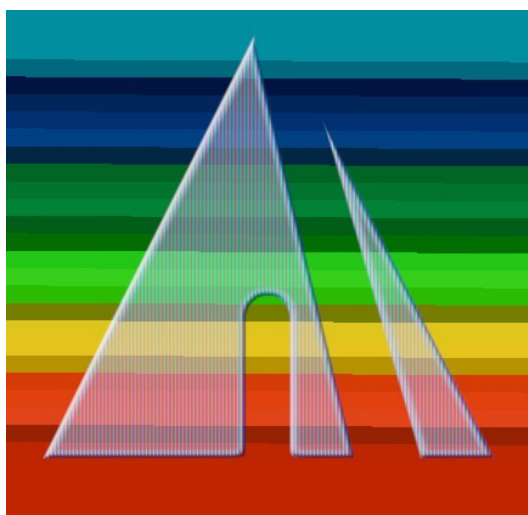

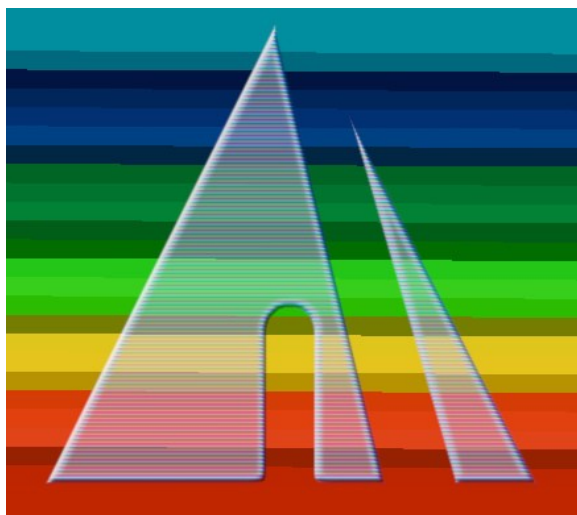

The first examples uses a blue foreground colour and the opacity set to 70 with the default values for the other options.

You can adjust the width of the coloured edges; set at 5 below:

Add horizontal or vertical lines:

Add fairy dust (otherwise boringly known as HSV noise):
