Ce script utilise le filtre "Twist" version 2.1

Download : <http://gimpchat.com/viewtopic.php?f=7&t=6732>

Ce script-fu est l'application d'un concept qui permet de créer des motifs, des brosses statiques ou dynamiques à partir d'une image.

Les brosses et les motifs sont sauvegardés dans le répertoire des préférences si l'option de sauvegarde est validée : "Save pattern or brush".

Lors de la sauvegarde un message s'affiche pour visualiser les caractéristiques de la sauvegarde.

L'utilisateur peut à tout moment supprimer les objets créés.

Remarque : Le dégradé n'est pas obtenu en utilisant le plug-in Twist.

Ce concept permet d'obtenir des outils aux couleurs de l'image pour, par exemple, créer des feuillages riches en couleurs.

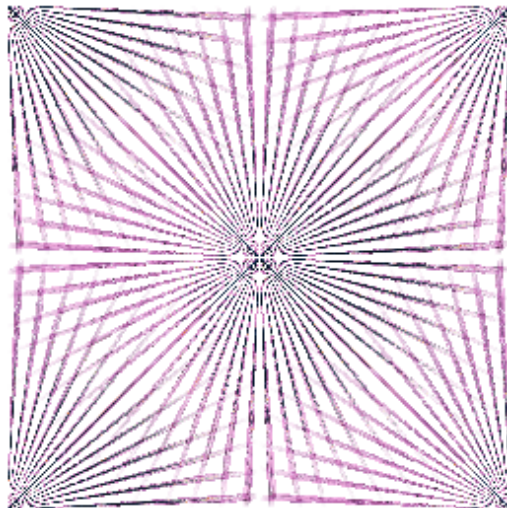

This script-fu is the application of a concept for creating patterns, static or dynamic brushes from an image.

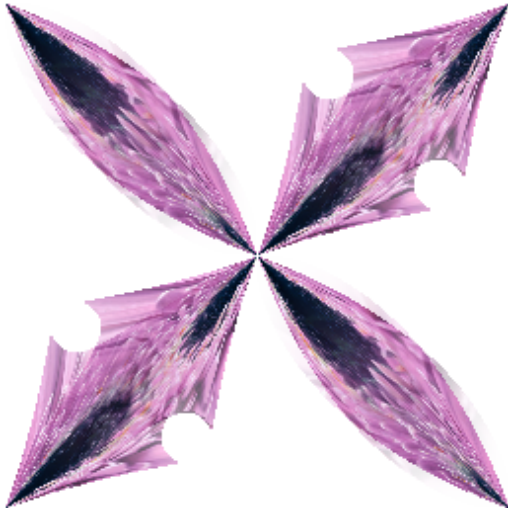

Brushes and patterns are saved in the "preferences directory" if the backup option is enabled.

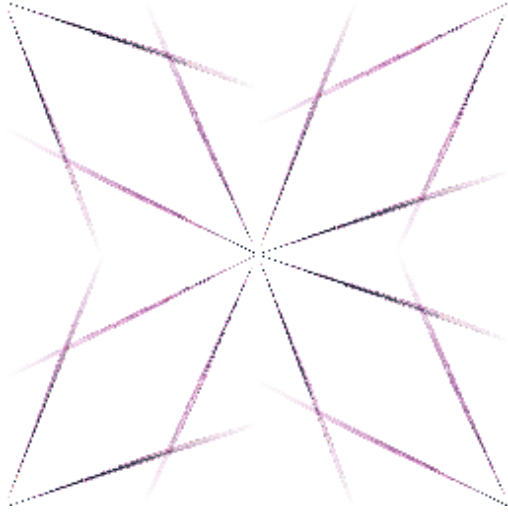

This script-fu uses the plug-in "Twist version 2.1".
